

Aaron Anama | Front-end Developer

I build interactive, responsive, and engaging user interfaces for the web. I am passionate about learning new things and consider challenges as opportunities to learn. I also work well with others.

My Projects

Web-mart → [Repo](#) | [Live Demo](#)

A frontend implementation of the fakestore REST API.

Technologies: React, Typescript, Styled-Components, REST API

Weda App → [Repo](#) | [Live Demo](#)

A weather app that leverages the openWeather API to display current weather details for a chosen city.

Technologies: HTML, JavaScript, Tailwindcss, REST API

Smart Resume Builder → [Repo](#) | [Live Demo](#)

An online CV/Resume builder, with CRUD and download functionalities

Technologies: React, CSS Modules

Sketch-Padi → [Repo](#) | [Live Demo](#)

A browser-based sketchpad that enable users make a sketch by moving their mouse over the sketchpad grids

Technologies: HTML, CSS, JavaScript

My Programming Skills

JavaScript/Typescript

I use JavaScript (ES6), React, and Typescript to create projects with well-structured and interactive user interfaces. I'm also skilled at using these technologies to make API calls to backend servers.

HTML and CSS

I create clean coded, well-structured and responsive web pages using semantic HTML and modern CSS features such as Flex box, CSS grid, media queries, and transitions. I've also used CSS frameworks such as Tailwindcss, CSS modules and Styled-Components. Also have beginner level skills in Figma, but can quickly pick up more skills with regular usage.

Server-Side Programming

I build REST API using Node.Js, Express and Mongoose (an ODM library for MongoDB).

My Soft skills

- Inquisitive and eager to learn
- Excellent at communicating ideas and collaborating with others
- Organized, hardworking, honest, trustworthy, and pay good attention to details
- Good at working within deadlines

Experience

Serch Service | Remote (volunteer) – Frontend developer (Dec, 2022 – Feb, 2023)

- Built the frontend UI for the Serch App user platform by transforming mock UI design to code using React
- Provided feedbacks for platform improvement

University of Benin – Assistant lecturer, Department of Entrepreneurship (Apr, 2016 – present)

- Research and teach business/entrepreneurship topics to students across different levels
- Provide guidance and mentorship to students across different levels as course adviser

Union Bank of Nigeria – Head, customer service, Warri Main branch Oct, 2016 – Apr, 2016)
